

## North Lake Alternative Example

- ◆ Assumed location of barrier at shortest distance across Salton Sea
- ◆ Habitat adjacent to shoreline to provide continuity - use treated water
- ◆ Treatment located in central area to facilitate conveyance
- ◆ Brine pond in area that would not require conveyance/pumping
- ◆ Air quality management in remaining areas

## Concentric Circle Alternative Example

- ◆ **Balanced available water in a similar manner to North Lake Alternative example**
- ◆ **Habitat adjacent to internal shoreline - would use treated water**
- ◆ **Treatment located in central area to facilitate conveyance**
- ◆ **Brine ponds at lowest elevation to avoid pumping**
- ◆ **Air quality management in remaining areas**
